porada

# 20<sup>news</sup>20

*In the new Twenty collection there's everything we might expect to find in a Porada home: elegance, sobriety, attention to details and quality of the materials. The new items have been created as a continuity of the existing collections, far from extravagances and eccentricities, in line with the need of stability and solidity imposed by the recent events. A comforting but not minimal Porada home, being able to create warm and enchanting atmospheres and embellished by pieces born to be classics, that are not subjected to the evanescent fashions's success as they don't follow them.*

MODULAR SOFA  
*Design: G. & O. Buratti*

Modular sofa with frame in solid canaletta walnut and black chrome or brushed brass end-feet. The cover in the fabrics of the collection is removable. Cover in leather non-removable. The seats lie on a belted metal frame covered by technical velvet. The seat cushions are upholstered with high-resilient crush-proof polyurethane foam with different densities. The upper part is in Memory Foam and the cover in padding paired with cotton and velveteen fabric. The frame of the arms and backs is made of solid fir wood and birch plywood, upholstered with crush-proof polyurethane foam with different densities and covered by white padding paired with cotton and velveteen fabric. The backrest cushions (width cm. 60/75) are filled with canalized goose feather (Golden label certified by Assopiuma), with crush-proof polyurethane insert and covered by feather proof cotton fabric. The bases are available in different dimensions (width cm. 80-100-160-200-240-300) and can be combined with additional trapezoidal elements to create peninsulas or seats with increased depth. The armrests can be padded or they can also be used as a side table, adding a side table element in solid canaletta walnut. On these elements it is possible to place a 45x45 cm cushion with a low armrest element.

**20** RUG COLLECTION

Hand tufted rug made of 100% ECONYL® thread, available in six different colours. The products are hand-made and therefore slight variations in dimensions and colours may occur. The ECONYL® regeneration process transforms nylon waste, such as disused fishing nets, as well as textile production waste, into a new thread; the nylon thread itself can be regenerated infinitely, keeping its characteristics intact in terms of quality and performance.

Composition: ECONYL®
